***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: patentability resides, at least in part, in the card connector having a seesawing mount in an opening, having a first end and a second end located above the contact portions of the terminals; and a resilient element having one end mounted on the insulated body and the other end pressing down the second end of the seesawing mount to press down the contact portions of the terminals, whereby when inserting an electronic card into the body, the card pushes down the first end of the seesawing mount to lift up the second end of the see-sawing mount so that the contact portions of the terminals can touch the card, in combination with the other limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Watanabe et al. 6,524,114, Takahashi 5,091,618, Bleier 6,402,036, Hoolhorst 6,021,945 and Benjamin et al. 6,015,311 were cite for similar card connectors.
